

Spring 1 Home Learning: What makes a great polar explorer?

1. In class, we will be researching and learning about penguins and polar bears. Can you research and create a fact file about another Arctic or Antarctic animal?
2. What would you wear to the North or South Polar Region? Design and label what you could wear and think about the different materials you would use to make it.
3. On winter mornings, the ground looks frosty. Ask a grown up to help you investigate and explore the frost and why it happens.
4. Look at a globe or picture atlas – can you find the North and South Poles? What countries can you see?
5. Research and use some building bricks or cardboard boxes to make a model polar animal. Maybe you could paint it too!
